

# OCEAN HORIZONS®

*New Logo! New Packaging! Same Great Shrimp!*

THE NEWEST LINE EXTENSION IN THE PREMIER TIER! **PHOSPHATE-FREE SHRIMP**

**Phosphate-free shrimp** performs similarly to all natural shrimp with a sweet, clean taste and firm texture. Its natural moisture is preserved allowing for an excellent bite and ability to get beautiful sear marks. We will be offering Phosphate-Free shrimp in Peeled, Deveined Tail-On and Tail-Off, as well as a brand-new Easy-Peel Category.

- All Ocean Horizons shrimp is packed according to our strict quality standards and only in processing plants which are certified by **Best Aquaculture Practices (BAP)**. This guarantees high quality shrimp produced in a clean environment and in a socially responsible way.
- We source our shrimp from around the world to guarantee year round supply and competitive pricing.
- Available in a variety of product forms and a range of sizes.
- Individually frozen. Thaw and use only what you need.

# Wild-Caught Pacific Cod & Deep-Skinned Atlantic Salmon with **KeepFresh™**

All Natural – No Chemicals, Preservatives, or Phosphates Added!

- Sustainably Sourced
- All-Natural Ingredients
- No Sodium Tripolyphosphate (STP)
- Retains Natural Moisture
- Deep-skinned salmon portions offer a lower fat content and cleaner flavor

**KeepFresh™** is a patented, all-natural, culinary technique that helps the fish retain its vital, moisture. This natural moisture contains only three ingredients: the respective fish protein, water, and salt. The **KeepFresh™** process involves marinating the fish with its own protein, inside and out, to lock in natural juices prior to flash freezing. This protects the fish throughout the freezing, storage, and cooking processes.

- Protects the fish from the effects of dehydration in frozen storage
- Promotes “forgiveness” during the cooking process and hold times
- Provides a premium eating experience
